

AMERITAS HEADQUARTERS RENOVATION

Ameritas has occupied their home office for more than 50 years. For more than 20 years, we have responded to their facility needs with a variety of projects, including a major renovation in 2005 that updated systems, repurposed spaces, and gave the complex a more contemporary image.

The first phase of work moved Ameritas' dental division to their Fallbrook facility, a new office building also designed by our firm. This move created space to expand other operations at the home office. We completely remodeled the executive floor, adding additional meeting rooms and videoconferencing. Nearly all of the building's offices and the cafeteria were updated. New lighting and interior finishes created a more uplifting environment. Architecturally, we redesigned the covered entrance and replaced the entire building envelope – giving the building a contemporary face while significantly improving energy efficiency.

Our relationship with Ameritas continues. We recently worked with them to create a technology-rich conference center with videoconferencing and other technological capabilities at the home office.
