

FCSA CORPORATE CAMPUS BUILDING 2

This new 77,000-square-foot facility is attached via skywalk to the original FCSAmerica Corporate Headquarters, and takes a cue from its predecessor's materials and agricultural theme. The masonry of the new building reflects an "Amber Waves of Grain" concept with tones and textures of a wheat field. Clerestory windows and shaded glazed walls provide natural light throughout.

Wide corridors, open stairways and visual connectivity between floors encourage employee interaction. Numerous gathering spaces are provided, many outfitted with telecommunications technology. On the ground floor, the main entrance corridor and the employee entrance corridor converge at a commons space, with a serving kitchen for catered events as well as typical break room amenities to provide a welcoming ambience.

The new building connects to the first building via a 200-foot skywalk. Midway is a "meet in the middle" structure with a conference room and informal meeting space.

AWARDS:

2016 AIA Nebraska Chapter
Excellence in Masonry Design Award

2013 Brick in Architecture Award
from the **Brick Industry Association**
Best in Class for the Commercial
Category

2012 AIA Nebraska Chapter
Honor Award for Detail

SIZE (GSF): 77 000

LOCATION: Omaha, Nebraska

PROJECT TYPE:

Corporate + Commercial

SERVICES:

Architecture

Mechanical Engineering

Electrical Engineering

Structural Engineering

Landscape Architecture/Site

Planning

Interior Design
