

## FCSA RETAIL OFFICES

We have completed more than 50 retail office replacements and renovations for FCSA, of which 30 were based on prototypes. To achieve operational consistency and reduce costs, we developed several prototype building concepts that can be adapted based on the market served at each location.

These prototypes range in size from 7,000 to 13,000 square feet and are located across Nebraska, Iowa, South Dakota, and Wyoming. The prototypes may be adapted and oriented to fit various site conditions. In addition, we developed corporate standards for finishes and materials, which are updated yearly. At each site, we have completed landscape improvements to highlight and strengthen the image of each building while improving pedestrian and vehicular circulation. Because of our long relationship with FCSA, we have completed numerous projects at the same location in some cases.

## Additional Photography

### LOCATION:

Nebraska, Iowa, South Dakota,  
Wyoming

### PROJECT TYPE:

Corporate + Commercial

### SERVICES:

Architecture  
Mechanical Engineering  
Electrical Engineering  
Structural Engineering  
Landscape Architecture/Site  
Planning  
Interior Design  
Construction Administration
