

PIUS X HIGH SCHOOL - ADDITION & RENOVATION

We have completed numerous projects at Pius X High School over the past 25 years to create a more modern, appealing, and efficient learning environment. This included a 100,000-square-foot addition and renovation, which added 12 general purpose classrooms and a music room; expanded the fine arts department, the student commons area, and the office areas; expanded the main gym and renovated the existing into two levels, with one becoming classrooms and the other a weight area. We relocated and expanded industrial arts, and expanded the media center. We also improved circulation with new corridors and exits and completed work on a cooling system for the entire facility.

SIZE (GSF): 100 000

LOCATION: Lincoln, Nebraska

PROJECT TYPE: Faith Based
K-12 Education

SERVICES:

Architecture
Mechanical Engineering
Electrical Engineering
Structural Engineering
Landscape Architecture/Site
Planning
Civil Engineering
Interior Design
Construction Administration
