

UNL - EAST CAMPUS LEGACY PLAZA

The Clark Enersen Partners recently developed a concept plan for Legacy Plaza, the expanse of green space extending from the C.Y. Thompson Library. The redesign of the green space will create new connections between the library, student union, and the Yuetter Gardens.

The plaza will celebrate four Nebraskans who served in the Secretary of Agriculture role for the U.S. Government. We identified placement of statues for each of these dignitaries, and designated locations for future honorees. We developed the concept design for new hardscapes (circulation paths and a plaza in front of the library) as well as seating and lighting, plantings, and a water feature for the plaza.
